Quasar 4K Cameras

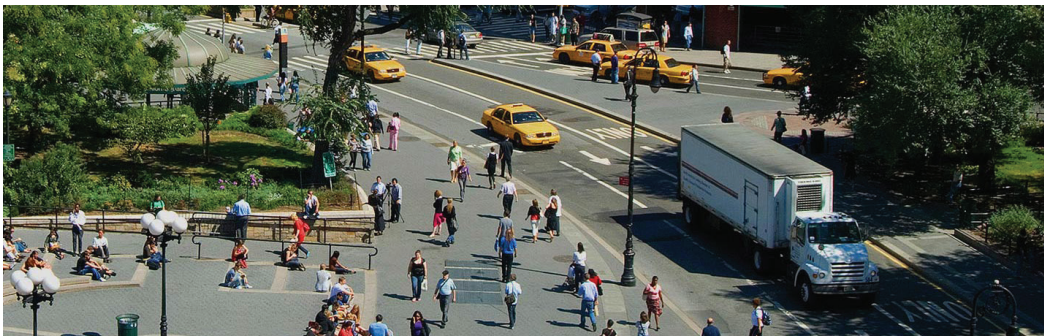

Discover the new evidentiary standard with DVTEL's Quasar 4K Camera.

4K evidence you need at a cost you can afford

The cameras deliver four times more detail at full 30 fps than today's best HD1080 cameras and also more detail than legacy 10MP.

- Offered in both mini-dome and bullet form factors.
- The cameras employ a state of the art, broadcast quality Ultra HD media processor.
- The 4K models also introduce the most advanced low light 4K image sensor ever introduced to the video surveillance industry making them the perfect solution for a wide variety of indoor and outdoor applications.

Optimize your 4K experience with DVTEL 4K Certified Solutions

- End-to-end family of products optimized to work with 4K technology at a lower total cost of ownership
